Geology of Arabian Sea Environmental Geology II Soil and Water Resources Environmental Hazards Hydrological Systems and Environments Environmental Impact Assessments and Management Natural Resource Management. Occupational Health and Safety. 2+1 2+1 2+1 2+1 2+1.Â 6. Laboratory Exercise Book in Structural Geology by Ghauri, A. A. K., 1989, National Centre of Excellence in Geology, University of Peshawar. 7. An Introduction to Geological Structures and Maps by Bennisen, G. M. Scientists and others use geology to understand how geological events and earth's geological history affect people, for example, in terms of living with natural disasters and using the earth's natural resources. As human population grows, more and more people live in areas exposed to natural geologic hazards, such as floods, earthquakes, tsunamis, volcanoes, and landslides.Â Geologic history shows that the processes that shaped the earth are still acting on it and that change is normal. Many other scientific fields overlap extensively with geology, including oceanography, atmospheric sciences, physics, chemistry, botany, zoology, and microbiology. Geology is also used to study other planets and moons in our solar system. Start by marking "Laboratory Exercises in Environmental Geology" as Want to Read: Want to Read savingâ€¦| Want to Read.
