Chapters: Interactive Stories is an app with dozens of interactive stories for players to choose from, ranging from horror, to romance, to fantasy and more! You get to make the choices! Here is a list of all current stories that have been released in the game. Books under this category are written by Chapters Originals team, they usually only have one chapter. Roman Steele - Fashion Designer. Logan West - Survivalist. Soren Lutzer - Influencer. Ethan Chasse - Occultist.

Each chapter in a book is related to the overall book theme, and chapters are found in many book variations and genres, such as nonfiction, fiction, academia, law, and more. The concept of a book chapter is to allow the author to break up the work, and for the reader to digest the material in increments, or chunks that are both understandable and memorable. After all, most readers aren't going to go through 30,000 or more words in one sitting. They need mental breaks.
