Euro Firefighter: Global Firefighting Strategy and Tactics

By Paul Grimwood

Jeremy Mills Publishing, United Kingdom, 2008. Paperback. Book Condition: New. 232 x 156 mm. Language: English . Brand New Book ***** Print on Demand *****.Paul Grimwood has responded and worked from over a hundred fire stations in the USA and Europe. In this, his third book, he demonstrates how the very best strategies and tactical approaches from Europe and the USA may be effectively combined to enhance firefighter tactics and safety at structure fires. The book also covers and exceeds the 2007 syllabus of the European (UK) EDEXCEL CFBT Instructor Qualification (90 hours) for practical Fire Behavior Training (flashover training in ISO shipping containers and other FDS units). Euro Firefighter is for the CFBT instructor, firefighter, company officer and fire chief. The concept of teaching about flashover using ISO steel shipping containers was developed in Europe now read how European instructors teach fire behavior using a vast array of Fire Development Simulators (FDS). This book will also take you out onto the fire-grounds of London, New York, Madrid, Chicago, Paris, Germany and Sweden, demonstrating how similar fires are fought using different strategic approaches and showing how US and EURO firefighting tactics are gradually aligning in many areas. From tactical ventilation...

This item: Firefighter's Handbook on Wildland Firefighting, Strategy, Tactics, and Safety by William C. Teie Paperback \$67.25. In Stock. Ships from and sold by IFSTA - International Fire Service Training Assoc. As I have begun my educational journey into learning more about woodland firefighting I found this book to be very valuable. I love learning, and while the layout of this book initially appeared "elementary" to me it ended up being one of the few that I will keep in my collection for years to come. It is a recent publication and cites many incidents that have impacted attack strategies and risk management in today's world. Well worth the cost! Read more. The purpose of this guideline is to provide a consistent approach to structural firefighting strategies and tactics. These concepts are written as guidelines to provide fire officers the ability to adjust tactics to a specific emergency. These guidelines are in no way intended to replace one of the most important assets on the fireground, the thinking fire officer. All firefighters should be intimately familiar with the tactical guidelines. Company officers should understand all company assignments and how each unit works within the larger fireground picture. All personnel should know the guidelines well enough, so that when they have to deviate from the guidelines, they realize the impact their actions will have on other operating companies, and communicate accordingly.

spread of and extinguish significant unwanted fires in buildings, vehicles, woodlands, etc. A firefighter suppresses fires to protect lives,
property and the environment. Firefighters typically undergo a high degree of technical training. This involves structural firefighting and
wildland firefighting. Specialized training includes aircraft firefighting, shipboard firefighting, aerial firefighting, maritime firefighting, and
proximity firefighting.
