Prosecutors in India and France:

A Comparative Study

Introduction:

In a criminal trial, the public prosecutors conduct the prosecution of the accused on behalf of the state. Decisions of the courts depends on the skills of the public prosecutors. Prosecutors institutes and carries proceedings in a court of law, especially in criminal court. (*The Law Lexicon, 2nd Edition (2006)Wadhava -publication, p.no1547.*) Research oriented and sincere prosecutors definitely contribute in the well organized criminal justice system in India. One of the aims of Criminal Justice Reform 2003 was to face the challenge before existing criminal Justice System in India as to improve the level of professional competence of the prosecutors and to insure they function in coordination with the investigation agency¹. The prosecutors are one of the major components in the criminal justice system “The prosecutors have more control over life, liberty and reputation than any other person in America.”² Therefore, in most of the countries prosecutors are indispensable authority.

Statement of Problem

Inefficien trole of prosecutors in criminal justice system of India is one of the reasons for low conviction rates in India. This situation is fatal to protection of society and for the faith of public towards law. The conviction rate of the state is a mirror as to the efficient functioning of prosecution system. As per N. R. Madhav Menon³,“One of the main objects of the criminal justice administration is to punish those who violate laws and commit crimes. Fear of punishment works as the most effective deterrence for the people inclined to commit crime. The Court after completion of the trial or the summary proceedings assesses the evidence and pronounces its judgment. The Court convicts an accused if the prosecution succeeds in proving the charge against him. It is only after conviction in a criminal case that the Court sentences punishment on accused which may be death penalty or imprisonment or fine or both imprisonment and fine. In some cases the convicts are not sentenced to any of these punishments and are released after admonishment and on giving a bond of good behaviour for certain commonly known as 'probation'. Hence irrespective of the amount of

punishment the conviction itself is an effective instrument to deter people from committing crimes.”

Rationale of the Study

Prosecution mechanism of any nation is a helping hand of that state. Degeneration of prosecution ruins basic democratic values expected under the Indian Constitution. Public Prosecutors must have duty to the public and to the court. If the prosecutor is biased that endangers the entire administration of the country In *State of Bihar V. Ram Naresh Pandey*⁴ it was held that the public prosecutor in larger sense is the officer of the court and under a duty to assist the court in fair administration of justice. Prosecution plays a crucial role in the administration of justice. The public Prosecutor is under a duty to not merely to seek convictions, but to act impartially and place before the court the evidence to enable the court to decide on the accused person’s innocence. The recent example for the inefficient prosecutor is “Best Bakery Case” i.e. *Zahira Habibullah Sheikh v State of Gujrath*⁵In this case, the state and the material witnesses approached the Supreme Court seeking retrial, as a trial was not conducted properly due to the witness turning hostile and non-cooperation of the public prosecutors. The Supreme Court then ordered retrial in the state of Maharashtra. The researcher has selected the India and France for this research because; these nations have different criminal justice systems.

Objective of the Study

- i) To critically analyze the criteria for success of prosecution in India and *vis a vis a* French prosecution machinery.
- ii) To observe role of supportive system in the success of prosecution in India vis a vis supportive system in France.
- iii) To analyze suggested Reforms in area of prosecution in India.

Hypothesis of the Research

- Supportive system is one of the important factors for the failure or success of prosecutors
- Coordination of the supportive systems in France is one of the causes of high conviction rates
- Inadequate Supportive systems in India are one of the causes of low conviction rates
