Collaborative learning is a method of instruction that basically involves grouping students to work together towards a common academic goal. The method is based on the theory that knowledge is a social construct, that educational experiences that involve interaction and social exchange, that are contextually relevant and engaging and are student-centered, lead to deeper learning. Experts in collaborative learning<sup>1</sup> claim that the active exchange of ideas within groups of students promotes critical thinking and there seems to be quite persuasive evidenc

Planning for Learning book represents the next step in the critical role that lesson planning plays in effective teaching. The authors examine. When we are reading "planning for learning" any book, we nourish our mind with the information inside it. And this is how food fuels us. It improves our language with a really amazing way. The books we read-build our language step by step. And the better kind of books we read, the better our language and brains get built. That's why we have to choose great books to read. Our speaking becomes clearer as we are able to choose the right words to express ourselves. And nothing can stop us, from speaking like native speakers. We can be even better than the native.
