

## *Colleagues and Members of NAMF*

We, the co-editors, on the behalf of the 46 contributors, take great pleasure in announcing the publication of:

## *The Handbook of Industrial Mixing Science and Practice*

sponsored by the North American Mixing Forum and published by John Wiley & Sons.

The book was officially launched at the 2003 Annual Meeting of the AIChE in San Francisco, California, on November 17th. The vital statistics are as follows:

- 22 Chapters authored by 46 contributors - Table of Contents follows
- Visual Mixing CD : a collection of mixing video clips
- a 29 page Editors' Introduction, including *Conversations overheard in a chemical plant* and *Mixing diagnostic charts*
- 1352 pages of text
- 770 figures
- a 24 page Index

Order your own copy before the first printing is sold out:

- Through your company library: ISBN 0-471-26919-0
- At Wiley's website <http://www.wiley.com/go/industrialmixing>
- or on-line through Amazon <http://amazon.com>

We hope you will seize the opportunity to own a book that we are confident is a lasting and significant contribution to the mixing literature, thanks to the efforts of many in the mixing community. All royalties from the sale of the book will be used to sponsor young academics who are winners of the NAMF sponsored grant for mixing research.

pipeline mixing (including static mixers), rotor-stator mixers, mechanical aspects of mixing and the role of the mixing equipment vendor. Specialized equipment for powder blending, pulp and paper, petroleum industry and high-viscosity mixing are discussed in the respective applications chapters. The core mixing design topics of miscible liquid blending, solid/liquid suspension, gas/liquid contacting, liquid/liquid mixing, mixing and chemical reaction, as well as heat transfer and mixing, are each covered in detail in one or more dedicated chapters. This Handbook is the most comprehensive, definitive and up-to-date treatise on industrial mixing available anywhere. It is well written, structured, illustrated and referenced.
