What are Cognitive Learning Strategies? Metacognitive learning refers to using a reflective thinking process to increase the awareness of own strengths and learning styles to improve the conscious control of learning and the ability to plan, monitor and change own learning behaviors. In short, knowing what to learn and how to go about learning it. In short, knowing what to learn and how to go about learning it. Metacognitive learning strategies may be defined as the procedures that students may use to help learn and retain the material, such as using a calendar to keep track of deadlines, highlighting important information in a text or creating associations to help remember difficult terms. There are multiple categories of metacognitive strategies, such as Learning networks and connective knowledge. Instructional Technology Forum: Paper 92.
